Author index to volume 235 (2001)

Àlvarez, C., J. Díaz and M. Serna, The hardness of intervalizing four colored caterpillars (1–3) 19–27
Amar, D., A. Raspaud and O. Togni, All-to-all wavelength-routing in all-optical compound networks (1–3) 353–363
Babel, L., T. Kloks, J. Kratochvíl, D. Kratsch, H. Müller and S. Olariu, Efficient algorithms for graphs with few P_4's (1–3) 29–51
Babilon, R., 3-colourability of Penrose kite-and-dart tilings (1–3) 137–143
Bey, C., An intersection theorem for weighted sets (1–3) 145–150
Bylka, S., Local improving algorithms for large cuts in graphs with maximum degree three (1–3) 53–67
Cameron, K., Thomason's algorithm for finding a second hamiltonian circuit through a given edge in a cubic graph is exponential on Krawczyk's graphs (1–3) 69–77
Caramia, M. and P. Dell'Olmo, A lower bound on the chromatic number of Mycielski graphs (1–3) 79–86
Díaz, J., see C. Àlvarez (1–3) 19–27
Díaz, J., J. Petit, M. Serna and L. Trevisan, Approximating layout problems on random graphs (1–3) 245–253
Dell'Olmo, P., see M. Caramia (1–3) 79–86
Drápal, A., Hamming distances of groups and quasi-groups (1–3) 189–197
Dueck, G.W., see P. Wang (1–3) 125–135
Eliahou, S. and M. Kervaire, Restricted sums of sets of cardinality $1 + p$ in a vector space over F_p (1–3) 199–213
Era, H., K. Ogawa and M. Tsuchiya, On transformations of posets which have the same bound graph (1–3) 215–220
Evdokimov, S. and I. Ponomarenko, Two-closure of odd permutation group in polynomial time (1–3) 221–232
Fiala, J., Computational complexity of covering cyclic graphs (1–3) 87–94
Fiedler, M., A numerical approach to long cycles in graphs and digraphs (1–3) 233–236
Gorgol, I., A note on a triangle-free — complete graph induced Ramsey number (1–3) 159–163
Gravier, S., M. Mollard and C. Payan, On the nonexistence of three-dimensional tiling in the Lee metric II (1–3) 151–157
Hliněný, P., Contact graphs of line segments are NP-complete (1–3) 95–106
Idzik, A. and Z. Tuza, Heredity properties of connectedness in edge-coloured complete graphs (1–3) 301–306
Janota, V., see P. Pančoška (1–3) 399–423
Kervaire, M., see S. Eliahou (1–3) 199–213
Kloks, T., see L. Babel (1–3) 29–51
Komlós, J., G. Sárközy and E. Szemerédi, Proof of the Alon–Yuster conjecture (1–3) 255–269
Konstantinova, E.V. and V.A. Skorobogatov, Application of hypergraph theory in chemistry (1–3) 365–383
Körner, J. and K. Marton, Relative capacity and dimension of graphs (1–3) 307–315
Korte, B. and J. Nešetřil, Vojtěch Jarník's work in combinatorial optimization (1–3) 1–17
Kratochvíl, J., see L. Babel (1–3) 29–51
Kratsch, D., see L. Babel (1–3) 29–51
Laywine, C.F., A derivation of an affine plane of order 4 from a triangle-free 3-colored K_{16} (1–3) 165–171
Leck, U., Optimal shadows and ideals in submatrix orders (1–3) 173–187
